Example of how the matX network grows

Build Alliance starts with 100 matX seats and creates an Alliance exchange to connect its project teams.

matX helps the first 10 people to set up their accounts. As the team grows, the exchange members can easily invite others including temporary works designers, subcontractors and suppliers. matX provides training for new people as they join.

All new exchange members have visibility permission so they can see who is in the exchange, what is listed on the exchange and the transaction data. Build Alliance exchange administrator monitor membership and can change user permission levels, enabling some people financial permission so they can buy and sell on behalf of the Alliance.

Build Alliance collaborates with parent companies and other strategic partners to create a wider internal and industry exchanges. Most of their matX users are members of many exchanges, allowing them to see and act on opportunities to buy and sell resources internally and with external project teams.

Growing exchanges with strategic partners allows the matX network to expand in a way that maximises opportunities and value for Build Alliance.

Build Alliance use the exchange dashboard, transaction data and user feedback to evidence matX is saving them cost, time and effort.

2020 offer:

- ✖ $250 per seat / 12 months
- ✖ Minimum number of seats applies
- ✖ Add additional seats as needed
- ✖ No hidden fees
- ✖ Fully supported platform

matX

Creating substantial value from sustainable practice

SUBSCRIPTION

reuse recycle reuse recycle

matX is radically different technology based on circular economic principles. Our collective goal is to reposition sustainable practice from overhead to profit

The construction and demolition sector consists of multi-disciplinary, multi-business and mobile teams that are continually forming, and disbanding depending on project needs. This complexity is in addition to Australia's employee turnover rate of ~15% per year.

matX offers a new way to connect teams

matX helps you build resilient networks that are robust and flexible. These networks can accommodate the movement of people and changing business requirements while maintaining:

- data
- team connectivity, and
- momentum.

matX combines smart exchange and subscription systems that evolve with your business needs

Smarter exchanges

- Create one or many exchanges for projects, programs, supply chains and strategic partners. Create exchanges as and when you need them.

Create New Exchange
Enter the a name for your new Exchange and click create

| Select Exchange Type ▾ | Exchange Name | CREATE |

- Your exchanges can be internal or shared by multiple businesses, short-term or ongoing. Exchanges can evolve with your business.

- Add exchange members simply by entering their email and clicking **Invite.**

Add exchange member
Enter the email address for the person you are inviting to join this exchange. An invitation will be emailed to them.

| Email Address | INVITE |

- Control exchange membership with the permission system: **visibility, financial** or **administration.**

Member Name ⇕	Permission Level ⇕	Administrator	Financial	Visibility	Action
James Richard	Visibility	☐ ✕	☐ ✕	✔ ☐	Remove
Kate Lee	Financial	☐ ✕	✔ ☐	✔ ☐	Remove
Casey Tan	Administrator				

- Share or transfer exchange administration to another member of that exchange. For example, create an exchange for multiple businesses. Then give one or more people from each business administration permission so they can invite and manage their members in that exchange.

Smarter subscription

matX is subscription-based platform because this approach:

- enables transparent and direct communications between businesses
- supports maximum commercial benefit for business when salvaging costs
- encourages all transactions from massive quantities sold in lots to a single small item
- fully supports the free issue or donation of resources, and
- works with the way businesses want to work.

A matX subscription buys seats

You choose how you use them:

- one seat gives the user access to join or create one or many exchanges
- invite anyone to join matX regardless of whether they are internal or external to your business
- seats can be removed and reassigned
- invite interested parties such as suppliers and sub-contractors on a short-term basis until they get their own subscriptions. Users can seamlessly jump from one subscription account to another.

An exchange's members can be covered by your or many business's subscriptions.

This degree of flexibility is key to building resilient networks for a commercially driven reuse economy
